Passenger's front door switch trim

Driver's side rear door switch trim

Passenger's side rear door switch trim

Driver's side air outlet trim

Passenger's side air outlet trim

SUPPLIES REQUIRED

Isopropyl alcohol

Shop towel

Masking tape

INSTALLATION

NOTE:

• Be careful not to damage the body paint finish.

• This interior wood trim kit should be installed only if the outside air temperature is 60°F (15°C) or above.

1. Using isopropyl alcohol on a shop towel, thoroughly clean the areas where the interior trims will attach.

2. Attach a strip of masking tape to the end of each outer adhesive backing, and remove 2 to 3 inches of the adhesive backing. Fold the ends back, and tape them to the front of the trims. Remove and discard the inner adhesive backing.

3. Position the interior trims on the existing panels. While applying light pressure on the inner panels, carefully remove the adhesive backing from the interior trims.

4. After installing each of the trims use the palm of your hand to hold pressure against it for 30 seconds.

Center Trim/Heater Control Panel Trim:

AIR OUTLET TRIM

USE AND CARE

Use a sponge or soft cloth dampened with mild detergent and water solution. After cleaning, wipe with a clean, soft cloth. Do not use cleaners or polishers containing abrasive compounds to clean the interior trims; they may damage the surface.
